

# Gasoline and diesel price development in event of price surge to EUR 200 / tCO<sub>2</sub> in 2027

→ Fig. 6

Calculations based on data from Bloomberg (2023), Destatis (2023), en2x (2023), European Commission (2023b). Note: forecast for consumer price index 2023. Assumption: projection of petroleum stockholding levy and energy tax remaining constant. Methodology: projection of procurement costs based on forward market prices for ICE Brent.
