

Final energy consumption by energy source in the industrial sector

→ Fig. 16

Agora Energiewende, Prognos, Öko-Institut, Wuppertal Institute and Kassel University (2024), historical data: AG Energiebilanzen (2024).

* Other electricity includes conventional, industrial electricity demand, additional power for electrifying process heat above 500°C as well as for newly established industries, particularly battery and chip production. PtH = Power to Heat.
